Hello all....

I have just recently become rather intrested in radio-packet
digital communications. Anyrate, I need some information to
help me get started... I am intrested in learning more about
AX.25 packet modem networks, how they operate and equipment
needed (What sort of modem.... 9600bps... what TNC? Software
???? JNOS???? KA9Q??? huh?) Anyrate, i am pretty lost so
basic info would be greatly appricatied...

BTW: And I might get screamed at, but will a codeless lice.
be enough? I know a good bit of electronics, should I go
for some sorta tech, in order to learn more.....

Lost..... tats me

Greetings,

I am looking at a Ten-Tec Antenna Tuner model 228 at a local ham radio shop on consignment but have found nothing in the rags (I have access to) on the quality and usefulness of the unit for use with my Century 21 transceiver.

Any info on used price and experiences with the tuner are much appreciated in advance.

thanks,
john
